

Name: _____

Date: _____

Habitat investigators

- Collect information about two different habitats.

	Habitat 1	Habitat 2
Description (for example, recently mown grass on a playing field)		
Amount of light (for example, whether it is shaded or in the sun)		
Temperature (for example, how warm or cold it is)		
Moisture (for example, how damp or dry it is)		
Shelter (for example, whether it is in the wind or sheltered)		

- The last two rows are left blank for your own ideas.

I can find out about and compare two habitats.

Name: _____

Date: _____

Collecting animals (1)

- Investigate some animals in your chosen habitats.

	Habitat 1	Habitat 2
Animals I found there		
Animal I have chosen to collect		
Where exactly the animal was found (for example, on the stem of the bush in the hedge)		
Notes about the animal		
Drawing of the animal		

I can observe and describe animals I have collected.

How did you do?
